

IPDC Fund:

Turning Promise into Possibilities

Background

The **Intellectual Property Development and Commercialization (IPDC) Fund** helps Ontario's cancer research innovators realize the commercial possibilities of their inventions. Funding is available to support development activities including proof-of-concept studies, validation, standard operating procedures, market analyses, IP protection and acquisition, expert guidance and management.

\$1M – \$5M

TYPICAL INVESTMENT
PER PROJECT

Project Preferences

- Cutting edge technology – transformative not incremental;
- Significant business opportunity – differentiated, competitive technology;
- Defined market segment;
- Regulatory strategy – clarity of the path, territories, time and capital required;
- Strong IP position – breadth, defensible, blocking ability, freedom to operate;
- Ability of funding to advance the technology to a value inflection point;
- Addresses an unmet need for cancer patients and/or cancer clinicians;
- Economic benefit to Ontario;
- Suitability of the team executing the work plan.

Conditions

The **IPDC Fund** is aimed at commercializing Ontario's cancer-related IP, arising from academic or non-academic sources. Investments typically range between \$1M and \$5M and dispersed in tranches based on achieving pre-established milestones during the planned development. FACIT expects to make investments at a variety of funding levels and not all projects should or will receive this maximum allowable amount.

All investment requests will be reviewed by FACIT as well as appropriate external reviewers selected from academic and business communities.

This is an investment, not a grant. FACIT will receive consideration in the form of a royalty on commercialization revenues and/or equity in start-up companies, often in the form of a convertible debenture.

It is an objective of FACIT to encourage the maximum participation of Ontario organizations in the development, commercialization and utilization of inventions arising from FACIT investments.
